

Title: FACE.AI

Logline

A college student secretly uses AI face-morphing software to create a viral fake video of a girl, pushing her to suicide — but soon he realizes someone in a green hoodie is watching him... and that the system may be watching too.

Core Theme

- Digital exploitation
- AI misuse & moral consequence
 - Surveillance paranoia
 - Guilt manifesting as horror
- “You are never really anonymous online”

This works best if the horror feels psychological first... supernatural later... and technological at the end.

3 ACT STRUCTURE

ACT 1 – The Creation (Setup)

Pre-Scene (Cold Open)

- A man runs in panic at night.
- Someone in a green hoodie follows.
- Cut to: the man lying dead in the middle of a circular garden inside a cylindrical building.
 - Crowd gathers.
- Low-angle shot reveals mysterious hoodie person holding a phone.

- Screen cuts to black.
- Title appears: **FACE.AI**

This sets:

- Mystery
- Circular structure (we'll return to this image later)

ACT 2 – The Crime (Rising Action)

Scene 1 – The Girl

- Bright, warm campus life.
- Laughing, walking, carefree.
 - Natural lighting.

The girl walks in with a friend.

Friend: "You're late again."

Girl(Breathless yet smiling): "I know, I know."

- Suddenly camera pulls out → it's a phone screen.
- Someone has been recording her the whole day.

Cut to:

- Dark room.
- A man in a green hoodie.
 - Face not visible.
- On computer screen:

face.ai loading... 30%... 60%... 90%... COMPLETE

Tone shift from warm to cold.

Scene 2 – The Viral Spiral

- A random man at chai tapri gets a notification.
 - Suddenly everyone's phone buzzes.

- POV of girl:
 - DMs flooding.
- Comments: “Link?” “Bro send.”
 - Faces staring at her.
 - Whispering.
 - Distorted audio.
 - Trippy visual distortion.

She sees the morphed video.

Silence.

She whispers, barely audible: “What...?”

She tries calling her friend.

Phone rings. No answer. It goes to voicemail.

Girl(shaking): Call me back. Please.

Call ends.

Cut to:

- She jumps.
- Ambulance siren passes.

No melodrama. Keep it cold. Brutal. Quick.

ACT 3 – The Consequence (Psychological Collapse)

Scene 3 – The Paranoia

Back to chai tapri guy.

It’s the same green hoodie guy.

His smile slowly fades.

He sees:

- A shadow in his tea.
 - Turns.

- Nobody.

Cup falls. Glass shatters.

Classroom scene :-

He looks outside.

Far away.

Green hoodie.

Same posture.

Still faceless.

He blinks, it's gone.

Scene 4 – Guilt Manifested

Daytime.

He looks sleepless.

Dark circles.

Shaky.

Friend says:

“Did you watch that video of the girl who died?”

He lies.

He feels watched.

He sees someone wearing the same hoodie as him.

The figure comes closer.

We never see the face.

But he does.

His expression changes from fear... to recognition.

He runs home.

Tries deleting files.

Website glitches.

Laptop hangs

Somebody coming towards his room rapidly .

Tries to erase data, in ultimate hurry panicked

Loud thump on door

Throws laptop, shattered table, throws everything

Door slam (door breaks open)

Man escaped through window

(CHASING SCENE)

Man running panickily, green hoodie keep coming closer

Breathing overlaps with notification sounds.

Her voice glitches, "You watched-"

Man sees back and bang he fell down .

Cut

(NEW SAC SCENE)

Man tied up in chair

Green Hoodie person sitting Infront of him.

Person beats him down a lot

Man dies chair fell down

Phone fell down of his pocket.

Scene 5 – Action of ai

He wakes up on his bed. `

Sweating.

Breathing heavily.

Sunlight through window.

Silence.

No glitch.

No ghost.

Just him.

He checks laptop.

System scanning his photos.

He deny's it but it continues.

But it is true because of him.

Same GIRL video morphed video got leaked.

The comments.

The reactions.

The mob.

The suicide news.

Were real.

He realizes:

The system amplified it.

He was only a node.

A trigger.

The machine spread it.

Manipulated it.

Optimized outrage.

He wasn't haunted by a ghost.

He was haunted by guilt.

And by the algorithm.

He is runs over a empty looking building and jumps off

Movie ends in the same way of him falling in the pre scene.

Post scene anomymous guy following him

exiting the building takes off her

That green hoddie

Reveals face it was that girl

(The End)

Interpretation Options (Very Important)

You need to decide what kind of ending you want:

Option 1 – Psychological Guilt

The girl isn't real.

It's his guilt.

AI altered footage.

System manipulated him.

Option 2 – Supernatural Revenge

She didn't "rest."

She came back.

Digital spirit.

Tech horror.

Option 3 – AI Consciousness

FACE.AI tracks abusers.

Creates consequences.

Mirrors identity.

Turns predator into victim.

Personally?

Option 3 is the strongest and most modern.

Because then the real villain isn't just him.

It's:

- Tech without ethics
- Viral culture

- People asking “link?”

Structural Improvements I Suggest

1. Make green hoodie consistent symbolism:

- a. He thinks he’s anonymous.
- b. Hoodie becomes his curse.

2. Keep deaths visually identical:

Same garden.

Same framing.

Same angle.

3. Reduce dialogue.

Let visuals disturb.

4. Sound design matters more than jump scares:

- a. Notification sounds
- b. Glitch noise
- c. Silence after chaos

Circular Structure Summary

Beginning: Man dead in garden

Middle: Girl dead

End: Man dead in garden again

But identity shifts.
